- **GPA:** 3.7/4.0 **SAT:** 1550/1600
- NESCAC All-Academic Student-Athlete on Men's Varsity Soccer, D3 National Championship Runner-Up 2021
- **Career-Applicable Courses Taken:** Introduction to Economics, Industrial Organization, Microeconomics, Macroeconomics, Introduction to Computer Science I + II, Data Structures

**The Beacon School, New York, New York** | High School Diploma June 2020

- **Activities and Societies:**
  - Varsity Soccer
  - High Honor Roll

## WORK EXPERIENCE

---

**Carlos Oliveira Soccer Academy, New York, New York** | *Assistant Coach* June 2021 - August 2021

- Coached children aged 5-12 to improve their technical skills and develop sportsmanship.

**Downtown United Soccer Club, New York, New York** | *Assistant Coach* May 2020 - Present

- Mentored, led, and coached young, aspiring soccer players.
- Consulted younger players regarding their college process and athletic goals. As a veteran of the club and youth soccer, I offer experience in terms of both the game and the college process.
- Worked with special needs players in similar coaching roles.

## LEADERSHIP EXPERIENCE

---

**Soccer Hamptons, New York, New York** | *Founder* May 2020 - Present

- Launched soccerhamptons.com, a soccer instruction service curated to the individual needs of clients.
- Developed this business from conception to execution at the beginning of the pandemic, recognizing a need in the community for this type of service.
- Analyzed the fixed and variable costs of our service to set profitable but market-competitive prices.
- Networked to build a core client base that rapidly expanded. Developed and maintained lasting relationships with clientele.
- Generated revenue of \$10k within the initial four months.

**Metropolitan Oval Soccer, Queens, New York** | *Volunteer Coach* September 2019 - November 2019

- Worked with younger teams as an assistant coach. Worked individually with groups of between 10 and 15 players aged 7-12 to develop their skills and character.

## SKILLS & INTERESTS

---

**Skills:** Object-Oriented Programming, Problem Solving, Microsoft Office, Data Structures, Time Management

**Interests:** I truly enjoy the way programming challenges you to problem solve as well as its unlimited creative potential. To date, I have mainly worked in and been taught through Java though I have some experience with HTML, CSS, and JS. I am also intrigued by the applied problem solving that is involved in financial work. I have been interested in applying industry and market knowledge to evaluate companies and their operations since I began my economics coursework at Amherst and found that passion particularly fueled in one course, Industrial Organization.
